The County of Marin Department of Public Works, in coordination with corridor stakeholders, are studying options to protect Highway 37 (from US 101 to the Marin County Limits at the Petaluma River) from inundation resulting from Storm Flooding and Sea Level Rise.

The community is invited to attend and learn more about the issue, potential solutions, and stakeholders’ efforts to protect environmental resources and mobility along this sensitive corridor.

For more information, please contact Dan Dawson at 415.473.6287 or ddawson@marincounty.org.
