Comparison between Current and Proposed Timber-Reinforced Berm (TRB) and Proposed Easement

- Same width for existing and proposed TRB (2.5 feet)
- Increase in TRB height to reach a standardized 11 foot elevation
- Deeper post depth of proposed TRB

10 foot proposed easement
(Not designed/intended for vehicle access)

Tidal elevation in feet

Average existing top of TRB

Distance in feet

0 5 10 15 20 25

Current TRB

Proposed TRB

10 foot flood level
7.5 foot annual King Tide
6 foot regular high tide
